

# RESPONSIBLE TIN INSIGHTS

The Responsible Insights Group is a quarterly forum bringing together companies in the tin supply-chain to share industry updates and better understand local projects, reporting, and sustainability across the tin sector.

## ABOUT

Responsible Tin Insights (RTI) formerly Responsible Tin Supply (RTS) is a free, quarterly industry forum led by the International Tin Association. It is an accessible starting point for companies across the tin supply chain to connect and exchange information, identify emerging issues and risks early, and support responsible sourcing. It provides a platform for improved understanding between upstream and downstream sectors, as well as providing networking opportunities and credible insights, and helps participants stay informed about key developments, challenges, and initiatives related to sustainable and responsible tin supply.

## WHY JOIN?

**Stay Informed-** Receive quarterly, credible updates on tin sustainability, supply chain risks, and responsible sourcing from ITA and guest speakers with minimal time commitment.

**Engage with ITA and stakeholders across the supply chain-** The group helps ITA grow its network, build relationships, and promote best practices, while giving members a space to ask questions, engage, and share experiences, encouraging collaboration across the supply chain

**Early identification of emerging risks-** Stay updated on responsible sourcing and sustainability trends, with early insights into supply chain risks, high-risk areas, and regulatory developments

**Understand Impacts-** Gain clear insights into how local projects, reporting requirements, and regulations affect your business, while having opportunities to showcase meaningful achievements.

## FOCUS TOPICS

### RESPONSIBLE SOURCING

- Conflict Affected and High-Risk Areas
- Tin Code
- Smelter Audits including Tin Code 7.3
- OECD, EU Mineral Regulations, LME & other evolving expectations

### ENVIRONMENTAL, SOCIAL & GOVERNANCE

- Tin Recycling
- Circular Economy
- Climate Change
- Regulations
- ESG Practices

### TIN INDUSTRY & PRODUCING AREAS

- Updates on ITA Projects
- Artisanal & Small-Scale Mining (ASM)
- Updates from tin producing areas

Membership Form: [RTI Confirmation of Interest](#)

## WHO CAN JOIN?

RTI is open to companies across the tin supply chain, including:

- Mining companies
- Smelters
- Metal traders
- Tin chemical producers
- Solder producers
- Tinplate producers
- Manufacturers and formulators
- Distributors
- Downstream users

## HOW IT WORKS?

- RTI is a quarterly virtual meeting
- It brings together a wide range of industry members
- Meetings feature guest presentations from industry members
- Discussions focus on tin sustainability issues and projects
- Participation is free

## HOW TO JOIN?

- To request to join the RTI Group, please visit [www.internationaltin.org/responsible-tin-engagement-groups/](http://www.internationaltin.org/responsible-tin-engagement-groups/) to download our confirmation of interest form or email [samantha.munro@internationaltin.org](mailto:samantha.munro@internationaltin.org) for more information

# RESPONSIBLE TIN INSIGHTS

The Responsible Tin Insights group is part of a wider set of engagement platforms. ITA facilitates two distinct engagement platforms, each tailored to different levels of commitment and focus.

**Responsible Tin Insights** is an accessible starting point for companies that want to stay informed, connected, and engaged on responsible tin sourcing, offering a simple way to build understanding and awareness across the supply chain with minimal time commitment.

For companies seeking deeper, more action-driven involvement, [the Responsible Tin Network](#) provides an action focused platform with increased collaboration and practical solutions.
